# FOURTH FURNACE IS STARTED AT TINTIC

Car of Fine Ore Shinned from Utah Consolidated Lease—Grutli Reaches 150 Foot Level in Shaft,

(Special to the "News.") Eureka, Aug. 16.-The fourth furnace at the Tintic smelter was started up Saturday. The fires were already going in the other three furnaces and it is understood that they will be blown in one at a time and within a few days the plant will be in full operation. The smelter has been placed in splendid shape since it was closed down. A new blast pipe was put in and it will now be able to accommodate the five furnaces at the plant and several more. When the plant was originally constructed the blast was made for two furnaces. It was found necessary to

after this.

A new sintering plant has been installed, the sampling works repaired and put in shape and the concentrating mill remodeled. With the new machinery installed the plant can now operate on a more economical basis than ever before.

Thomas Griffith and Charlie Smith have sent out a car load of nice silverlead ore from their lease at the Utah Consolidated mine during the last week. The ore is about the best that has been taken out of the Utah in several years and it is expected that the carload will bring in the neighborhood of \$1,500. Another car will probably be sent out before the first of next month.

Walter Fitch of the Chief Consolidat-Walter Fitch of the Chief Consolidated says that another carload of ore is ready for shipment today. The car which was sent out several days ago is high is silver and lead and consequently will net a good profit to the company. The ore bodies at the mine are opening up in splendid shape and continually growing larger. continually growing larger.

DRIFTING IN BLACK JACK.

According to Frank Birch, assistant According to Frank Birch, assistant superintendent of the Knight mines, three drifts are being pushed out from the 1,400-foot level of the Black Jack property in search of ore. Some ore has been encountered on this level and the drifts are following good leads that have been encountered.

William Hatfield is still working the Opohongo property from the Black Jack. At present he is carrying on operations from the 300-foot level.

Jack. At present he is carrying on operations from the 300-foot level.

The Eureka City Mining company has opened up an office in the Commercial club building where it is issuing stock in return for mineral rights in property held by the lot owners of the city. Most of the desirable parts of the city have been obtained, but it is

deemed best to allow all to have a chance to get in.

The shaft of the Grutli property in

East Tintic has reached a depth of 150 feet and is now working in a gray line formation. For some time General Manager John P. Bestlemere says the formation has been loose and full of small caves or "bugholes," but this has lightened up and the ground is now has tightened up and the ground is now

exceptionally hard.

When the 200 level is reached a station will be cut and it is believed that sinking will then be continued to the 300 foot level.

#### SLOW DAY FOR STOCKS.

Market Drops to Slowest Galt That Has Taken Place This Year.

The local stock market dropped to extreme duliness today and stocks moved with a "don't care" spirit. Throughout the morning session it was featureless. Buying and selling were not devoted to any stock, but all seemed to come in for their little share. improvement in the price of metals has had no effect whaever upon the local market, and conditions reached the point of stagnation.

There has scarcely been a day this year that did not show greater activity than was brought out today. Black Jack was selling at 23½ cents and Grand Central, with its support which has held it strong, dropped from \$2.30 \$2.721/2. Iron Blossom was down to The total number of schares sold to-

day was 26,350, and the price represented by the transactions was \$17,083.

On the curb market a number of stocks made their appearance, but transactions were only registered in Bingham Central Standard, which sold for 28 cents. Montana was offered at 14 cents. Utah mine received an offer of \$1.25 and was offered at \$1.35.

J. F. Callbreath is Here to Complete Details of Topics to be Discussed At Annual Meeting at Goldfield,

Arrangements are today being made or the program of the annual meeting of the American Mining congress which convenes this year at Goldfield, Nev. J. F. Callbreath, secretary of the congress arrived from Denver this morn-

gress arrived from Deaver this morning to take up the various subjects to be discussed. While here he will go over the program with Harry S. Joseph who is on the committee for the arrangement of the program.

Among the most important topics that will come up at the mining congress will be that of securing a greater use of silver. This will be so arranged that the political issue will be excluded and it will be strictly upon business principles.

Under the head of silver will fall a number of topics. The first will be transportation and a method of securing a cheaper rate in the conveying of silver, then there will be a discussion of the international agreement. Another will be its effect upon the manufacturer and what can be done to increase his trade with other countries through the use of silver. A well known eastern manufacturer has been asked eastern manufacturer has been asked to be present and discuss the subject from his point of view. Then what can be done to ald the producer will be dis-

Another question which will come be-Another question which will come before the congress will be the present mining laws. There will be a discussion of considerable length on the new ruling on patents and many will be in favor of a reversal of the present system. The verticle side line and the method of working claims for a patent will also be discussed. will also be discussed.

Mr. Callbreath expects to leave to-night for Goldfield where he will make arrangements for the annual meeting.

INSPECTING TINTIC PROPERTY. Lost Josephine Shaft Being Pushed

To Depth. (Special to the "News.")

Provo, Aug. 16,--John M. Holdaway has gone to Tintic to inspect the Aram Mining company's property in North Tintic in which he is interested.

Mr. Holdaway states that the company is driving a tunnel to strike the

Mr. Holdaway states that the company is driving a tunnel to strike the vein which was opened in the shaft. He expects the tunnel to be completed by February and that the property will be developed into a pay mine soon thereafter.

Reports from the Lost Josephine mine, where the company has eight men at work, are to the effect that the shaft has been sunk 50 feet and is now in a white decomposed quartz from which colors are being obtained. The company proposes to continue working, and opening up the property until it can be fully determined whether they have a mine or not.

CONTRACT FOR POWER PLANT.

Gold Springs Company Soon to Start Big Operations.

Big Operations.

Contracts have been let by the Gold Springs Mining and Power company for the building at Modena, Utah, of a complete gas producer electric power plant. The contract was made by C. A. Short, H. R. Elliott and A. S. Martin, who for the past seven months have been working on the plans of the company. The contracts were made directive with the Westinghouse Machine pany. The contracts were made directly with the Westinghouse Machine company and the work of installing the plant will be in the hands of the F. C. Richmond Machinery company. The work will be started at once and must be completed by Dec. 8, 1909.

'The plant, which will cost approximately \$50,000, is to include two 190-horsepower Westinghouse bituminous

The plant, which will cost approximately \$50,000, is to include two 190-horsepower Westinghouse bituminous gas producer engines, two 18x18 three-cylinder gas engines of 182-horsepower at the altitude of 5,500 feet, and two 110-killowatt generators, with complete electrical equipment. Construction is to be upon the two-unit plan throughout, both as a matter of economy in operation and to provide against possible closedowns when any portion of the machinery should get out of order. Ample water supply has been provided by the purchase of the famous Clark and Desert Springs wells, besides other sources of supply for emergencies. Automatic electric pumps will keep tanks filled with water, and one mile of pipe line will connect the tanks with the plant, which is to be situated at the end of the railroad Y in Modena.

The plant will not only furnish electrical anearsy for the company, but al-

The plant will not only furnish elec trical energy for the company, but also for the neighboring camps and the business house of Modena.

A great many improvements are also being added at the Jenny inine. The improvements there will cost close onto \$20.000 270.000.

#### TINTIC STANDARD.

It is believed that the timbering of the Tintic Standard shaft to the 400-foot level will be completed today and tomorrow the new machinery and the work on the placing of a station on the 400 level will begin. Word from the mine this morning was that the timbering has been nearly completed

and that the machinery is almost in shape to begin work.

As soon as the station is placed the company will begin sending the shaft to the 600 level. From there drifting will commence to get under the big body of low grade ore that was found on the 400 foot level. The management is confident of having a paying mine

#### FROM ONE JAIL TO ANOTHER.

When W. B. Riley was released! from the state prison last Saturday, he was immediately arrested and is now on his way to Carbon county, Wyo., where he will face a charge of grand larceny. D. B. Campbell, sheriff of Carbon county, presented the requisition papers on Gov. William Spry, who honored them. Riley was convicted of grand lar-Riley was convicted of grand inreceny about a year ago and sentenced to serve one year by Judge Armstrong. By good behavior, Riley reduced his sentence two months and was released Saturday. In Wyoming, he is accused of stealing a horse from August Wickstrom in Carbon county, Nov. 20, 1907.

# UNION PAGIFIC HAS SETBACK

New York, Aug. 16 .- Union Pacific common stock, which has been pursuing an upward course steadily for the last few weeks experienced a sharp set-back in the stock market this afternoon. After closing Saturday at 217%, the stock opened this morning at 219 but this new high record price

217%, the stock opened this morning at 219 but this new high record price brought out a flood of selling orders and it soon went back below Saturaday's closing price.

On the decline the market became inactive but this afternoon various reports were circulated to depress the price and shortly after 2 o'clock a sharp selling movement set in. This uncovered a number of orders to sell when the decline reached a certain figure and the price quickly broke to 214, a loss of five points from the high point of the day and of 3% from Saturday's closing price.

Reading, New York Central and Souther Pacific were affected by the declines but the general market was only slightly influenced.

Professional traders met the opening demand for stocks and the market sold well off to about Saturday's closing level. Atlantic Coast line sold at a loss of 2 points, North American 1% and Interborough-Metropolitan preferred 1. On the decline there were sales of many large blocks of stocks, one transaction in Union Pacific amounting to 7,700 shares and one in United States Steel to 8,500. Renewed activity on the long side in New York Central forced it 1% higher and promoted a rally in the general market, but Union Pacific was stiggish and did not get beyond Saturaay's final prices.

Continuous selling of the Union Pached

prices.
Continuous selling of the Union Pacific stocks offset attempts to bid u cific stocks offset attempts to bid up prices in other quarters, and the market went down pretty steadily. Supporting orders, however, were encountered in the general list at about the level of Saturday's closing. Unior Pacific broke to 1½ and the preferred 1¼ under last week's final prices. Ontario & Western and Consolidated Galso lost a point. Business fell of tremendously at the lower figures and the market was steady through the second hour. Toward mid-day the tone improved somewhat with New York Central and Southern Pacific making the best showing. Some of the making the best showing. Some of the less active stocks were quite strong St. Paul preferred going up 2 points. Northwestern 1½, International Paper and the Kansas City Souther

per and the Kansas City Southern stocks 1½.

Bonds were steady.
Independent movements went on from time to time in the stock market which did not have any far-reaching effect of the balance of the list. A renewed decline which cost Louisville & Nashville and American Beet sugar and St. Paul Missouri Pacific, Wabash preferred United States Steel, Peoples Gas, American Sugar and American Ice I, was arrested for a while by the rapid bid ding up of Reading and Southern Pacific to new high figures. Southern Pacific to new high figures. Southern Pacific was 1½ and 1½ respectively above last week's final price. The Union Pacific stocks were less of a factor in the market and met steady selling after every ket and met steady selling after ever recovery to about last week's closin

prices.

Prices moved narrowly until 2 o'clo when there was a violent break
Union Pacific which drove it down
214 compared with 219 at the outset a 217% at Saturday's close. The other market leaders ran off rapidly in sym-pathy and there was little left of the early material advances in Reading. early material advances in Reading, Southern Pacific and New York cen-tral.

The market closed weak. Supporting orders stopped the break in Union Fa-cific at 214, but the preferred mean-while slumped to 114 and many other stocks had lost from 1 to 1½. The colstocks had lost from 1 to 172. The col-lapse in Union Pacific was variously put down to a bad drive, attempts to shake off a weak following and realiz-ing by insiders. Union Pacific jumped above 216 again, but the balance of the list did not rally with much vim, although there was spirited bidding up of Northern Pacific. In the last few minutes selling was renewed in all quarters and low prices for the day were made for many stocks. Earlier than 5 a. m. today.

#### PRODUCE.

Chicago. Aug. 18.—The wheat market was strong at the start, with prices up @ @1 compared with Saturday's final figures. Commission houses in general were active bidders at the opening, the demand being chiefly on an advance of 1½@2½d at Liverpool. On the bulge several prominent longs sold freely of the September delivery which caused a material reaction. Weather conditions in the northwest were generally favorable for harvesting and threshing. September opened at 100½@100½ and sold off to 93½@90½. December declined to 96½ after opening at 97½ to 97½.

Continued drouth in the southwest was again the chief factor in the corn market. Prices at the opening were ½@½ to ½@½, higher. September being at \$%2,666½. For a time the price held within the opening range.

Oats were firm early today with wheat and corn, but eased off later on selling of December by cash interests. September opened at ½@½ higher at 38½ @38½ and sold off to 33½.

Provisions were strong particularly pork. Light stocks of provisions at all important centers was the principal factor. Opening prices were from 5 cents lower to 20 cents higher.

The market gained fresh strength following the publication or statistics relating to the visible supply of wheat in the United States which showed a much smaller increase than had been expected. Later in the day, however, prices yielded again tac renewed profit taking. September selling off to 99½ and December to 96½. The close was easy, with September unchanged, at 99½. December was a shade lower at 98½.

284. December was a shade lower at 3614.

Corn—A sharp break occurred late in the session on liberal profit taking, prices dropping about 1 cent from the top. The close, however, was firm with September up % @% at 6614.

Close Wheat—September, 98%; August, 101%; December, 6614; May, 100.

Corn—September, 6614; December, 5614; May, 6146614.

Oats—September, 38%; December, 384; May, 40% 6404;

### THE MARK OF PRUS -A GUARANTEE

All works of taste must bear a price in proportion to the skill, taste, time and material used in their design and manufacture. Things called "dear" are, when

justly estimated, the cheapest. These are axioms that apply to our jewelry and justify our "reason" able price."
